

## Shoreless Lake School Wisconsin

# NEWS LETTER: 3rd Quarter 2018-2019

## A Letter from the Principal

I would like to wish you all a very blessed Holy Week and Easter Sunday! It is rewarding to see our school community growing in faith, joy, and love of God and neighbor during this Season of Lent. I am very proud and thankful for our teachers, for their encouragement to our student body to keep going, to grow in virtue, to stand tall, and become the "kind of persons God wants us to be," as Fr. Pedro often reminds us in his homilies. May we open our hearts generously to God's Grace, to receive His abundant blessings!

Thank you, Fr. Miguel, for coaching our students for the National Code Rush Competition. Many congratulations to our SLSW team, which proudly earned sixth place this year!

And now, let's enthusiastically begin this last phase of the school year!

## *All School News*

### Catholic Schools Week

The third quarter was to begin with Catholic Schools Week: a week long celebration of our wonderful Catholic school. However, Our Lord had other ideas, as the first day was hit by a snow storm followed by three days of extremely cold temperatures, so the only day of celebration was Friday, and our students were able to bowl in the afternoon. It was the only event of the week but everyone had a great time.

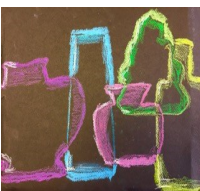

**7 Corners of Art:** You will find the 6th graders' still life projects displayed in the three corners of this page and their optical illusion projects in the corners of the back page.

### 2019 Regional Spelling Bee

Cecelia Eberle and Elizabeth Webb earned the privilege of competing in the Region 3 Spelling Bee held in Portage, WI. Elizabeth placed 5th in that competition among 30 contestants. To the right is Cecelia and Elizabeth just before the competition began.

SLSW students competed again this year in the Code Rush National Computer Coding Contest. They placed 6th in the nation. Congratulations!

## Formation of the Whole Person

### *Life Skills*

SLSW offers more than just academics; formation of the whole person also includes life skills. The 7th grade includes a sewing unit. Mrs. Shepler assisted the 7th graders in honing their sewing skills by making patch-work

### *Academics*

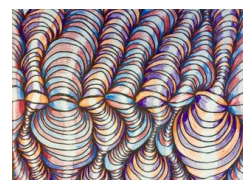

**Science:** Below, the 6th grade science class explores the motion of the Earth's tectonic plates with graham crackers and frosting. (Yum!)

The 7th grade science class has been studying the life sciences. Below, the students are using microscopes to compare the difference in structure between animal and plant cells. Later they continued their exploration of cellular structure by examining human cheek cells .

Right: SLSW students competed well in the Knights of Columbus Knowledge Contest this year, receiving several Gold, Silver, and Bronze awards in Spelling and Math.

This is a summary of the activities of the third quarter of our third year of "forming the whole person" . Shoreless Lake School Wisconsin is now accepting applications for sixth, seventh, and eighth grades for the 2019-2020 school year. We hope you will consider choosing Shoreless Lake School Wisconsin for your daughter or grand-daughter. It is where the formation of our future begins.

Shoreless Lake School Wisconsin : "Always Beyond".
