

Shoreless Lake School Wisconsin

NEWS LETTER

A Letter from the Principal

I would like to address our School community and share some exciting news that has been happening since the beginning of the year. It has been a great blessing to have daily Latin Mass at our next door Adoration Chapel, celebrated by Fr. Pedro, and on Wednesdays a Novus Ordo Mass, celebrated by Fr. Miguel at St. Aloysius Church.

We are fulfilling our main goal of the school, which is developing a personal encounter and intimate relationship with our Lord Jesus Christ through the sacraments, such as daily Mass and frequent confession, as well as personal prayer.

At the academic level, we are most proud of the high standards maintained by our teachers and the positive acceptance of the students in a nurturing family environment.

I would also like to take this opportunity to express my deepest gratitude and appreciation for all the prayers and support we receive from our parents, staff, and all our friends and benefactors. May God continue to reward you and bless you abundantly!

Girls School News

Core subjects such as language, history and science are challenging and give the girls a sense of accomplishment. Here, you see some of the students as they dissect a flower in a science lab setting.

Art is one of the girls' favorite subjects. To the left is a picture of the art project Palm Tree on the Shore.

A field trip is planned for each quarter of the school year. To the right, the girls are exploring a corn maze at Trienen Farms.

Boys School News

Daily Mass

It is important to us to begin the day with Mass, either the Latin Mass in the Adoration Chapel four days per week, or the Novus Ordo Mass at St. Aloysius Church on Wednesdays. We end the day in thanksgiving during a visit to the Adoration Chapel. Here you see the Shoreless Lake School Wisconsin students in Adoration in the Mary Mother of God Adoration Chapel.

7th Grade Science

In seventh grade Science, students are presented with the living world as being the creation of God who is the great Creator, Sustainer, and Lawgiver, without whom the evident design, ingenious structure, and orderly function of nature would be inexplicable. Photos, charts, and videos clearly illustrate the life science concepts being taught, which students apply by means of experiments, projects, and dissections.

Besides dissecting a flower, the seventh grade boys have dissected a fetal pig, as seen in the photos above, learning and labeling parts of the various body systems.

History/Geography

The first quarter field trip, the Trienen Farm Corn Maze, was a lesson in map reading and spacial recognition. Here, the boys use maps provided by Trienen Farm to search out a specific sequence of locations.

After successfully completing the course, the boys enjoyed recreation with the many challenging mind games found near the maze.

This is Shoreless Lake School Wisconsin. Although a fledgling school, its Catholic centered curriculum, academic college prep courses and dedicated teachers are reaching far into the future. The family centered environment creates an atmosphere where true friendships and an attitude of concern for our fellow-man can flourish. We sincerely appreciate your prayers and support and ask you to consider contributing to this worthy cause through Mass intentions, tuition scholarships or a simple gift. No amount is too small. Help us to help our youth prepare for the future. Shoreless Lake School Wisconsin: "Always Beyond".
